VILLA TUSCOLANA

Villa Tuscolana, located on the slopes of Mount Tuscolo, was built in 1578 on the ruins of Cicero's ancient Roman residence. Originally owned by Cardinal Alessandro Rufini, it gained the name "La Rufinella." In the 18th century, architect Luigi Vanvitelli transformed it into a luxurious residence for the Jesuit Order. Over the years, it hosted many prominent figures, including Prince Luciano Bonaparte and Queen Maria Cristina of Bourbon. In 1872, King Vittorio Emanuele II financed excavations around the villa, uncovering historical ruins. Later, Elisabetta Aldobrandi Lancellotti merged the villa with two others through underground tunnels. Damaged during WWII, it was restored and became a hotel under the Salesian Order.
